

# INSPIRED CLADDING SYSTEMS

Stomenti is a smart new-age material that is friendly to use as well as a fantastic alternative to natural stones that need to be mined from the depths of the earth.

Stomenti is a concrete cement based product, that is developed by technology mastered over years of working with this material. Made indigenously and totally by hand, Stomenti is the future right here & now. More than 80% of Stomenti, as a material composition has the ability to be recycled making it so much better for the earth. Starting with simple but most easily usable designs & patterns, that include bricks, stone- both flat and undulating - geometric and linear, we introduce 29 patterns (with all in more than one colour shade) as a part of the first cluster.

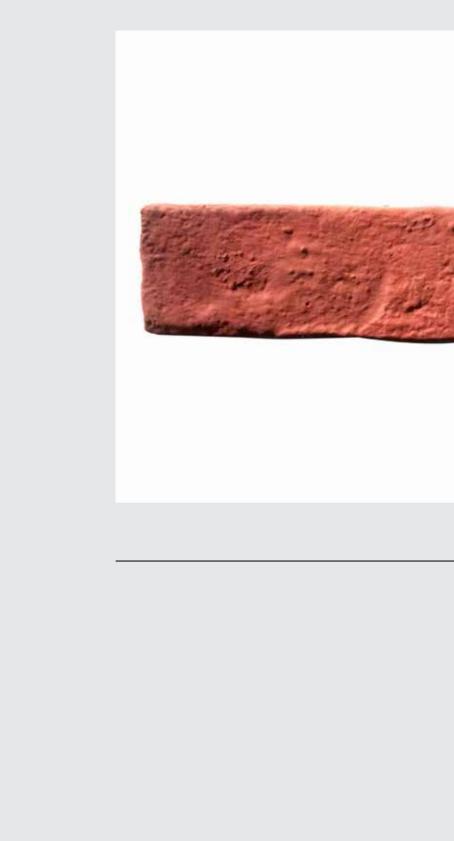

All these designs are meticulously developed looking at popularity of usage, as well as easy applications in both interiors and exteriors. Another advantage of Stomenti is it being algae and fungi resistant that ensures the exteriors to look the same for years to come with least sign of aging.

This introducing collection has all that one can use easily as a complete facade or part walls and surfaces as and how desired.
